Hangman Sniper System Target

The Patriot Modular Hangman Sniper target system is comprised of two AR500 steel plates mounted from 5/16" thick steel chain. The circle head plate is 12" and the chest is 16" (both can be modified upon request). The heavy duty steel base is made up of 3/4" thick walled galvanized pipe for strength and rigidity yet allowing weight reduction. Pipe is structurally stronger than solid bar. Each pipe fits into a center mounting point which allows you to set the target on uneven ground. Each target plate is height adjustable using the mounting chains.

The entire Sniper System sets up and breaks down easily requiring no tools which allows users to quickly put the target into action in the field quickly.

Premium Certified AR-500 3/8" plates are effective up to .308 calibers and a 50 Cal. version is available using the Patriot LRT-STD upon request.

Outstanding Sniper Target
Easily adjustable for rough terrain!

Weight: 75# fully assembled
All components simply and easily replaced if needed
