

Patriot Mobile Battery Regeneration Station

Model: #PBCS-20

As Convoy Live Fire Training and SITS range emplacements grow larger, the need to charge the supporting battery power supply increases. The constant man hours and loss of training throughput to carry them from the Range to charge is slow and expensive. With the new PBCS-20, take your charging station to the Range, Field, or a central point on site. Safer, faster, and centralized charging gets your batteries back in use, and the shooter back in training.

Simultaneously Charge 8 to 64 or More Batteries at a Time

- Remote Generator/Hardwire
- Microprocessor Charging System
- Controlled Ventilation
- Acid Resistant Coatings
- Audio/Visual Alarms
- Heating/Cooling
- Spill Containment
- 20' & 40' lengths
- Self Contained
- Automated Shut Down
- Acid Neutralizing Trays
- Acid Resistant Floor
- Insulated
- Explosion Resistant
- DOD/OSHA Format
- Reverse arc proof
- Multiple Storage Racks
- Emergency Eye Wash
- Spill Floor pan
- Interior/Exterior Steel paneled
- Explosion Proof lighting
